

Biomedical Engineering Society

University of Illinois at Urbana-Champaign

The UIUC Chapter of BMES strives to support the growing biomedical engineering community with valuable activities such as student mentoring, networking opportunities, career guidance, and international conventions. As a society, BMES integrates the findings of modern science with advances in education and technology to incorporate academic, medical, governmental, and business aspects to the organization. Members of BMES enjoy a communal approach to professional development, the fundamental reason for why this society is an emerging organization locally, nationally and internationally for affiliates with an interest in bioengineering.

WHY SUPPORT BMES UIUC?

Bioengineering at the University of Illinois at Urbana-Champaign is recognized as one of the top undergraduate and graduate engineering programs in the nation. As an extremely active, quickly growing organization, BMES-UIUC draws the top bioengineering students that the university has to offer.

Supporting BMES-UIUC offers companies exposure on the engineering campus, including contact with the top academic talent at the university even beyond the field of bioengineering. In addition, companies have access to some of the strongest leaders of our student body.

By pledging to support the Biomedical Engineering Society at UIUC, you are helping shape bright students into talented leaders and professionals, and contributing to the advancement of biomedical innovation.

BMES has a range of sponsorship options detailed on the following page, and would be happy to work with you to fit your specific sponsorship goals. Contact **Mallika Modak** at modak2@illinois.edu for more information.

BMES UIUC at Engineering Open House 2014

Every year, BMES UIUC showcases several award-winning technical projects at Engineering Open House, a college-wide engineering science fair that has over 20,000 attendees.

Thank you 2013-2014 Collaborators!

2014-2015 Corporate Sponsorship Options

Benefit	Gold	Platinum	Single Event
Logo on BMES Website	X	X	
Logo on BMES T-shirts	X	X	
Logo on EOH Promotional Materials		X	
General Meeting			\$200
BMES Conference Sponsor			\$200
EOH Sponsor			\$200
Info Session			\$200
Amount	\$100-199	\$200+	

Event Descriptions

General Meetings

BMES-UIUC holds monthly general meetings to update our members on upcoming events. These meetings constantly attract over 30 members of various majors. Our corporate sponsor makes a presentation at these meetings on a predetermined topic. This is a great way for company representatives to network with members in a quickly growing field.

Event Descriptions (continued)

Engineering Open House

Engineering Open House (EOH) is a college-wide science fair held in the spring semester each year. Departments and societies in the College of Engineering design multiple projects and put them up for display to the public. It is an excellent opportunity for students to work in a multi-disciplinary team and develop presentational skills.

BMES not only participates in EOH, but consistently does an outstanding job of getting multiple awards. This event helps fuse the education students get in the classroom with creativity, discipline, delegation and other vital team skills.

Annual and Regional Conferences

BMES UIUC takes several students to the BMES Annual Meeting every year, many of whom present posters or give talks about their research. Besides being a great networking and career development experience for our students, this conference brings a lot of visibility to our section. BMES UIUC also attends regional conferences, which help us connect with companies, students, and BME programs in the area.

Outreach Events

BMES provides academic support to Bioengineering undergrads by organizing programs for admitted students and hosting exam review sessions for courses in the Bioengineering curriculum. By volunteering at the local Children's Science Museum and running an after-school Bioengineering program for middle school students, BMES strives to increase biomedical interest throughout the community. BMES also raises money to support medical research through events such as Relay For Life.
